SENIOR PRODUCT DESIGNER

Professional Summary

Senior Product Designer with ten-plus years of organizing chaos on screens, and before that on paper. I work on products where people need to trust what happens behind the interface: security apps, grocery checkout, complex home setups.

I start with research, decide with evidence, and treat engineering cost as a design input. At Vodafone, as the sole designer on Secure Net's malware cleaning flow, I helped cut drop-off from 60% to 40% for about half a million users. AI is part of my everyday process, from research agents to design tokens that go straight into the frontend.

Core Skills

Product & interaction design: Product Design · UX Design · UI Design · Interaction Design · Information Architecture · User Flows · Journey Mapping · Wireframing · Prototyping · Design QA

Visual systems & craft: Visual Design · Typography · Layout · Responsive Design · Component Libraries · Design Systems · Design Tokens · Pattern Libraries · Accessibility-aware UI

Research & experimentation: User Research · Moderated Usability Testing · A/B Testing · Funnel Analysis · Product Analytics · Assumption Mapping · Design Sprints · Workshop Facilitation

AI & technical workflows: AI-Assisted Research and Documentation · Figma Make · Claude · Cursor · HTML/CSS · Code-adjacent Prototyping

Collaboration: Stakeholder Management · Cross-Functional Collaboration · Mentoring · Agile · Scrum · Kanban · SAFe

Tools: Figma · Sketch · InVision · Hotjar · Contentsquare · Google Analytics

PROFESSIONAL EXPERIENCE

UX Expert / Senior Product Designer — Vodafone Group

Düsseldorf, Germany · 2020–September 2026

- Designed Vodafone Secure Net, a cybersecurity and digital-wellbeing product, across web, iOS and Android for markets including the UK, Germany, Italy, Spain and Portugal.
- Sole designer and design lead on the Secure Net cleaning tool (Android). Directed a dedicated UX researcher (12 moderated sessions), tested two concepts and then three design variations, reduced the flow from 6 user-facing steps to 2 and told users they could close the app without losing progress. Drop-off fell from 60% to 40% across about 0.5 million users in four markets; the average recommendation score for the Android app rose from 5.0 to 6.5 out of 10.
- Defined frontend-side requirements to speed up the vendor's white-label scanning tool; the vendor delivered the backend changes.
- Redesigned the Secure Net web dashboard. Drop-off fell by about 15% in the first month of a limited rollout; in usability tests, errors per task dropped from 3 in 10 to 1.7 in 10 with no loss in findability. Moved the app-install prompt from a top banner that about 90% of test users didn't notice into the navigation.
- Designed in-app guidance for placing routers and extenders at home, with a live Wi-Fi quality indicator and a fallback to support. Support requests fell by about 20%; setup satisfaction rose from 3.1 to 3.8 out of 5.

- Built a hybrid visual QA process with QA, engineering and the product owner: QA covers coarse visual bugs, design keeps fine design-system checks, live reviews only when the PO decides they're worth it. Adopted as team practice.
- Introduced AI-assisted workflows for UX documentation and research synthesis.
- Mentored designers inside and outside the team.

Senior UX Designer — real.de Lebensmittelshop (now Kaufland.de)

Düsseldorf, Germany · 2018–2020

- Sole UX designer in the e-commerce product team. Set up usability testing, design sprints and closer designer-developer collaboration.
- Redesigned the grocery checkout from one long page into five clear steps, with the delivery slot earlier and the total price always visible. Research with usability tests, Contentsquare and Google Analytics; validated in a scoped A/B test with a meaningful lift in checkout completion and rolled out.
- Designed favourites and category browsing on responsive web. Ran assumption mapping and A/B tests with category owners to decide between one-off promotional banners and a scalable category pattern.

Digital Product Designer — trivago

Düsseldorf, Germany · 2016–2018

- Designed internal B2B and B2E tools for R&D teams: talent, marketing and analytics.
- Design lead on Talent Community, a hiring channel that replaced the CV with a structured questionnaire at the first stage. Research with recent hires and HR, journey maps for both sides, a linear questionnaire flow. Cut hiring cost per employee by up to 17% for students, interns and junior roles.
- Contributed to the trivago Design Pattern Library.

UX/UI Designer & Art Director — Freelance

Remote · 2012–2016

- UX and product design for startups and established companies: web and mobile apps, social platforms, e-commerce, marketplaces and e-government services.
- Ran projects from discovery and information architecture to interface design, client presentation and delivery; coordinated designers and front-end developers where needed.

Designer — Multiple Companies

St. Petersburg, Russia · 2008–2015

- Graphic design, web design, illustration, iconography, UI and UX for startups, technology companies, magazines and digital products.
- Spoke at World Usability Day 2014 and ProfsoUX 2015.

MENTORING

UX Design Mentor — ADPList

Remote · 2020–Present

- 100+ one-to-one sessions on design process, portfolios, CVs and job-search strategy.
- Four long-term mentees reached their goals: new jobs, portfolio projects, promotions.

PROJECTS & WRITING

- **AI support app for non-technical parents** (side project, 2026). AI app that answers tech questions from text and screenshots. Built with Cursor and Claude, runs on Kimi; the Android version is in use.

- **"Consistency vs Usability"**, Medium / Bootcamp (2022). A simple framework for when to follow the design system and when a new pattern is worth it.

EDUCATION

Gleb Kalinin's AGENCY — AI Design Lab

Online · 2026
Practice-based lab on using AI agents in real design work: research, documentation, ideation and delivery.

Nielsen Norman Group — UX Certification

London, UK & Berlin, Germany
UX Leadership · Design Tradeoffs and UX Decision Frameworks · Facilitating UX Workshops · Lean UX and Agile · Managing User Experience Strategy · Analytics and User Experience · Effective Ideation Techniques for UX Design

Artem Gorbunov Design Bureau

Moscow, Russia · 2011
User Interfaces and Information Design

Kymenlaakso University of Applied Sciences

Kouvola, Finland · 2008
Graphic Design, Media, Production · Erasmus exchange semester

Saint Petersburg State Polytechnical University

St. Petersburg, Russia · 2003–2008
Specialist degree in Applied IT in Design
